

We regulate frequencies, wattage, and content of public broadcasts. It's an arbitrary decision as to what content we want to allow. My arbitrary opinion is that nudity should not be allowed on public broadcasts. (Such is the current regulation.) And I don't think we should be relaxing the way we enforce the rules, this would simply be a step towards getting rid of the rules all-together. I respect other people's opportunity to have a different arbitrary opinion on regulating content, but this is my opinion and I'd like to make it known.

Thank you for your consideration.

Jason A. Hunt
